PROFESSIONAL SUMMARY

Aspiring AI and Machine Learning practitioner pursuing a Bachelor of Science in Civil Engineering at Multimedia University of Kenya. Developing practical experience through independent projects involving Python, machine learning, natural language processing (NLP), LLMs, AI agents, data classification, and sentiment analysis. Interested in contributing to AI training, data annotation, data quality, and model evaluation tasks. Analytical, detail-oriented, and committed to learning and following project guidelines.

TECHNICAL SKILLS

- **Programming:** Python
- **Data Analysis:** Pandas, NumPy, data cleaning, preprocessing, and exploratory data analysis
- **Machine Learning:** Scikit-learn, classification, regression, feature engineering, model evaluation, and confusion matrices
- **NLP and AI:** Text preprocessing with Python regular expressions and spaCy; project-based practice with LLMs, AI agents, sentiment analysis, and data classification
- **Visualization:** Matplotlib
- **Additional Skills:** Analytical problem-solving, attention to detail, and independent learning

SELECTED PROJECTS

1. Heart Disease Prediction

- Developed classification workflows using Logistic Regression and Random Forest.
- Practised data preprocessing, feature scaling, and model evaluation.

2. Employee Attrition Prediction

- Worked on an employee attrition prediction project using XGBoost.
- Practised data preparation and categorical feature handling.

3. NLP Text Preprocessing

- Used Python regular expressions for text cleaning, case normalization, and special-character removal.
- Explored spaCy for natural language processing tasks.

4. Feature Engineering and Data Preparation

- Implemented label encoding, one-hot encoding, dummy encoding, age binning, and outlier detection using Pandas and Scikit-learn.

5. LLM, AI Agent, and Text-Analysis Practice

- Developed practical familiarity with LLMs and AI-agent concepts through personal projects.
- Practised AI-related text analysis, classification, and sentiment-analysis tasks.

EDUCATION

Bachelor of Science in Civil Engineering
Multimedia University of Kenya
Expected graduation: 2028

RELEVANT STRENGTHS

- Attention to detail and consistency in handling data
- Analytical thinking and problem-solving
- Willingness to follow task instructions and quality guidelines
- Interest in AI model training, evaluation, and improvement
- Written and spoken English
